16410 S. John Lane Crossing - Unit #400 Lockport, IL 60441

Enables anyone to enjoy the barbecue flavor in the comfort of their own home or cottage. Even by candlelight in the event of a power failure! Simply prepare your meal, remove the grill, add a log and dine by the fireside. When assembled, the support bracket and legs may remain permanently in your fireplace, acting as a drought spacer between the back of the firebox and the wood. Allow your fire to burn down to red coals and add a layer of charcoal briquettes. When white ash covers the briquettes, spread them out to reduce excessive flare-ups and insert the grill. You are ready to barbecue! True barbecue flavor is achieved by juices dripping on the embers. Ashes from the embers conveniently absorb and burn off any excess juices.
